Aluminum and Copper Pipe

Insulation pipe has white embossed insulation pipe and black rubber pipe

White PE embossed insulated pipe

Features of white embossed insulation pipe:

OUTER LAYER-Anti-aging, UV-resistant PE film, wear-resistant embossed pattern, anti-aging.

MIDDLE LAYER-IXPE foam, dense cell, heat and cold-resistant, impact absorption, no water penetration, good thermal insulation. Water cross-linked PE foam.

INNER LAYER-Closed-cell structure, air tightness; good thermal insulation, temperature resistant -60°C~120°C.

Rubber insulated pipe

Features of rubber insulation pipe:

Pipe Insulation, Material Polyethylene, Pre-Slit, Temp. Range -160 Degrees to 200 Degrees .

The pipe insulation has a better function of moisture condensation. Insulation material is both the insulation layer and moisture-proof layer. There is no need to drop the water vapor permeation protective layer so that it has a better moisture condensation function.

The pipe insulation tubing is made of rubber and plastic which holds very tight and you do not feel tired when operate it.

Copper and Aluminum Pipe

The black layer on the outside is a PVC plastic pipe, its function is to protect the aluminum pipe.
